Bachelor's Degree in Philosophy

Univ. of Bologna (2017) — Logic, ethics, history of thought

Erasmus Exchange

Univ. de Granada — International mobility experience

Digital Copywriter

Agenzia Dante Alighieri (2022) — SEO writing, competitor analysis, content strategy

EXPERIENCE

Full Stack Web Developer

2024–2026

PuntoLuce/EDIF

E-Commerce Open2b · 50,000+ products · 300+ suppliers

- Full e-commerce template development (HTML/CSS/JS/Twig) on Open2b: mobile-first structure, dark mode, multi-step checkout, dynamic filters, product cards with badges, SKU and real-time availability.
- 20+ REST API and webhook integrations: Brevo, Feeday (Schema.org), Kelkoo, Doofinder, Trovaprezzi, Trusted Program, DocFinance (bridged licence with live Open2b data), Facebook Graph API, Google Identity Services.
- Advanced GTM tracking: full GA4 e-commerce, Facebook Pixel (url_passthrough), Microsoft UET Enhanced Conversion, Consent Mode/Cookiebot, GDPR compliance. Verified via Network tab audit.
- Unified VAT validation: OpenAPI IT-start (Cerved) + EU-start (VIES), filesystem cache, smart soft-fail, auto-fill company data, 28 EU countries.
- Bidirectional sync Open2b ↔ Brevo: 58,000 contacts with automatic B2B/B2C segmentation; 23,550 products with rate-limit management and retry; real-time webhooks.
- 15+ internal PHP apps: price-comparison feeds, automated invoice/receipt archiving via cron, estimated delivery times with statistical KPIs, fiscal classification for EU/non-EU customers.
- Performance optimisation: LCP from 12s to 4–9s (mobile) via lazy-loading, preload, deferred JS, forced-reflow elimination. TBT reduced by 40%. CSS refactored with root variables and W3C validation.
- OAuth 2.0 social login: Google Identity Services (client-side JWT) + Facebook SDK v18.0 with auto-registration and multi-account handling.

Junior Web Developer Trainee

2024

Boolean Academy – Boolean S.R.L.

- WhatsApp-layout clone with Vue.js: interactive components and real-time messaging. Contact and user sections integrated via a custom Laravel API handling all backend operations. API testing and monitoring via Postman to ensure correct frontend-backend integration.
- Apartment management dashboard with Laravel and Vue.js: designed the RDBMS (tables and relations), implemented full CRUD operations, and styled views using Bootstrap grids and custom SCSS.
- Travel app with Laravel and jQuery: registered users can organise their trips, define itineraries with days and stops. jQuery used for quick client-side logic operations.

Web Content Manager

2023

CopyStudio

- Content creation for digital projects
- Semiotic analysis and competitor analysis
- Consultancy support for SEO strategy

SEO Copywriter

2022–2023

Halaweb

- WordPress content management, SEO-oriented article writing, competitor analysis
- Development of information architectures for editorial sites and sector portals
