PROFILE

Freelance full stack developer, registered as self-employed in Italy (P.IVA). I work remotely for companies and professionals on e-commerce, websites and web applications: builds from scratch, maintenance, third-party integrations, tracking and technical SEO.

On Open2B/Scriggo I built from scratch the theme of **shop.puntoluce.net**, an electrical supplies e-commerce turning over around €20,000 a day, and for almost two years I looked after its checkout, integrations and internal applications. For new projects I work in Next.js and TypeScript.

My background in philosophy and semiotics at the University of Bologna means I also handle the text: copy, content structure, editorial SEO.

E-COMMERCE EXPERIENCE

Punto Luce / EDIF — full stack developer

Oct 2024 – Jun 2026 · Sasso Marconi (BO) · employee, permanent contract

Development and maintenance of **shop.puntoluce.net**, a B2B/B2C e-commerce for electrical and plumbing/HVAC supplies on Open2B, in four languages (IT/EN/ES/FR).

- New theme built from scratch on Open2B/Scriggo: home, product lists and pages, cart, three-step checkout, customer area; mobile-first, dark mode, dynamic filters
- Checkout with conditional rules between payment and shipping methods (free-shipping threshold, non-EU countries, private/business invoicing), postcode autocomplete across 8,000 municipalities
- 15+ PHP applications on the Open2B API: product feeds for Trovaprezzi and Kelkoo (Italy, France), automatic assignment of 50,000 customers to tax groups, cron-based receipt archiving, duplicate supplier-code check across 25,000 products, export of 60,000 orders, product descriptions generated with the OpenAI API
- 20+ REST/webhook integrations: Brevo (sync of 58,000 contacts and 23,550 products, real-time webhooks), Feedaty with Schema.org rich snippets, Doofinder, DocFinance, Facebook Graph API, Google Identity Services
- Tracking via GTM: GA4 e-commerce, Meta Pixel, Microsoft UET with enhanced conversions, Clarity; Cookiebot and Consent Mode v2 for GDPR compliance
- VAT number validation (Cerved + VIES) across 28 EU countries
- Performance: LCP from 12 s to 4 s, TBT -40%, CSS cut from 15,000 to 10,000 lines; WAVE/axe accessibility audit

CLIENT WORK (FREELANCE)

Livello Zero — full stack developer

Jun 2026 – present · livellozero.games

Editorial website about video games, built from scratch.

- Next.js (App Router) and TypeScript, deployed on Vercel
- Custom CMS: the client writes and publishes articles, uploads images and manages sections without technical skills
- Ongoing maintenance on an annual fee after delivery

Futura Blog — full stack developer, editor, SEO/GEO copywriter

2026 – present · remote

Editorial platform with AI agents, designed and built with a colleague from idea to launch.

- Platform development in Next.js/TypeScript
- Writing the prompts for the AI agents that generate the content
- Editorial review, tone-of-voice calibration, SEO/GEO optimisation, Google Search Console analysis

All Studios — web developer, structure and testing

2026 · remote

Application for teams of graphic designers: shared workspace with advanced tools and artificial intelligence.

- Site and app structure: pages, sections, content organisation
- Copywriting, development of some pages, application testing before launch

NDN Luxury — web developer

2026 · remote

Website of a resin and microcement finishes brand.

- New pages, maintenance and improvements to the existing site
- 3D animations

ESH – Erasmus Student Housing — web developer

2026 · remote

Rental housing for Erasmus students.

- New site pages and maintenance

Beauty Broker World — QA

Feb – Apr 2026 · remote

- 22+ end-to-end test scenarios on critical flows: OTP, invites, IBAN, referral, checkout, account
- GitHub issues reproducing server errors (502, 409, silent duplicate invites), regression testing after every fix
- Work with a team distributed across Italy, Brazil and the USA via branches, PRs and code reviews

Copystudio — copywriting and brand identity

Nov 2023 – Jul 2024

- Copy and brand identity for corporate websites, including organisations with public healthcare contracts
- Client interviews to define tone of voice, target and positioning before writing

Hetaweb — SEO copywriter

May – Nov 2023 · Lucca

- Editorial management of the blogs of 30+ organisations, including the Italian National Rugby Team
- Writing and optimising SEO articles, performance analysis on Google Search Console

PERSONAL PROJECT

Osservatorio Accoglienza — open source

2026 · osservatorioaccoglienza.org · github.com/gianlivio/osservatorio-accoglienza

Public archive of migrant reception contracts in Italy, built from scratch.

- Ingestion and cleaning in Python of 18,000 records from three ANAC datasets
- Parser for 90 ministerial PDFs with pdfplumber, for data on unaccompanied foreign minors
- Static site in Next.js/TypeScript on Vercel, automated data updates with GitHub Actions, technical SEO and structured data
